2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

(d) Claim 1, it is not clear what is the ultimate output of the processor.

4. Applicant's arguments filed November 15, 2004 have been fully considered but they are not persuasive.

Applicant argued that the reference does not teach data storing means and packet generating means,

Art Unit: 2111

The claims do not recite how those means are relevant in the operation of the processor and how they interact with other elements.
